Determine the shipping weight
Shipping weight examples
Packaging and impact fees

Definition	The shipping weight is calculated based on the item's unit weight or dimensional weight.
Using this article	The shipping weight of an item is used to calculate FBA fulfillment fees. After reading this article, you will be able to determine the shipping weight for an item. To accomplish this task, first know the unit weight, product volume and dimensions, the dimensional weight, and the product size tier of the item.
Fees that use this attribute	FBA fulfillment fees FBA removal order fees FBA disposal order fees Fulfillment fees for Multi-Channel Fulfillment orders FBA inbound placement service fee

Related terms	Dimensional weight Product size tier Product dimensions and volume Unit weight FBA fees reimbursement policy: Weight and dimensions

Determine the shipping weight

1. Determine the product volume and dimensions of the item.
2. Determine the product size tier of the item.
3. Determine the unit weight of the item.
4. Determine the dimensional weight and whether it is used to calculate the fees for the item.

Shipping weight is determined by the unit weight or dimensional weight, depending on size tier and whichever is greater (see details below).

- **Unit weight** is the measure of how much your product weighs packaged.
- **Dimensional weight** is equal to the unit volume (length x width x height) divided by 139. The dimensional weight for large bulky and extra-large items assumes a minimum width and height of 2 inches.

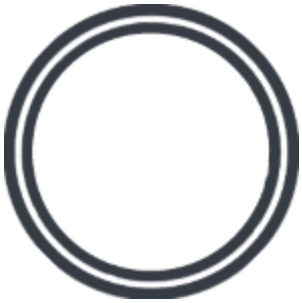

For core FBA excluding apparel, apparel, and dangerous goods products, we use the greater of unit weight or dimensional weight to calculate the shipping weight for all large standard-size, large bulky, and extra-large units, excluding extra-large 150+ lb units. Small standard-size units and extra-large 150+ lb units use unit weight. This also applies to units fulfilled through Multi-Channel Fulfillment and units that are receiving Low-Price FBA rates.

Core FBA excluding apparel, apparel, dangerous goods, and Low-Price FBA	
Size tier	**Shipping weight**
Small standard size	Unit weight
Large standard size	The greater of the unit weight or dimensional weight

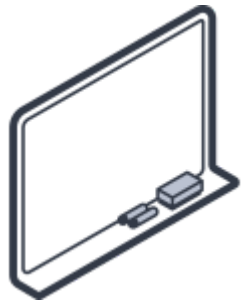

Feedback

Core FBA excluding apparel, apparel, dangerous goods, and Low-Price FBA	
Large bulky	The greater of the unit weight or dimensional weight
Extra-large 0 to 50 lb, 50+ to 70 lb, and 70+ to 150 lb	The greater of the unit weight or dimensional weight
Extra-large 150+ lb	Unit weight

Shipping weight examples

Unit weight greater than dimensional weight	
	**Disposable plates** Dimensions: 6.3 x 6.2 x 4.8 inches Unit weight: 3 lb Dimensional weight: 1.3 lb Shipping weight range: Large standard (2.75+ to 3lb)* **Based on unit weight, which is greater than dimensional weight*
Dimensional weight greater than unit weight	
	**Glass jars** Dimensions: 16.6 x 13.3 x 7.7 inches Unit weight: 6.6 lb Dimensional weight: 12.2 lb Shipping weight range: Large standard (12+ to 12.25 lb)* **Based on dimensional weight, which is greater than unit weight*

Feedback

Dimensional weight with 2 inch minimum	
	**White dry erase board** Dimensions: 40 x 1 x 25 inches Unit weight: 4.5 lb Dimensional weight: 14.4 lb, 2-inch minimum applied (40 x 2 x 25, divided by 139) Shipping weight range: Large bulky (14+ to 15lb)* **Based on dimensional weight, which is greater than unit weight*

Packaging and impact fees

Packaging can impact the dimensional and unit weight of the product. Fees are calculated based on these weights, as explained above.

Here's an example of how packaging can impact fees.

Original packaging	Packaging with reduced dimensions
Dimensions: 12.2 x 12.0 x 4.3 inches	Dimensions: 12.2 x 12.0 x 3.2 inches
Unit weight: 3.6 lb	Unit weight: 3.6 lb
Dimensional weight: 4.52 lb	Dimensional weight: 3.4 lb
Shipping weight range: 4.5+ lb to 4.75 lb (based on dimensional weight, which is greater than unit weight)	Shipping weight range: 3.5+ lb to 3.75 lb (based on unit weight, which is greater than dimensional weight)
Product size tier: Large standard-size (4.5+ lb to 4.75 lb)	Product size tier: Large standard-size (3.5+ lb to 3.75 lb)
